IMPORTANT SAFETY INSTRUCTIONS

WARNING

To reduce the risk of fire, electric shock, injury to persons or exposure to excessive microwave oven energy when using your appliance, follow basic precautions, including the following:

1. Read and follow the specific "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY".
2. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children unless they are older than 8 and supervised. Children less than 8 years of age shall be kept away unless continuously supervised.
3. Keep the appliance and its cord out of reach of children less than 8 years.
4. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard. (For appliance with type Y attachment)
5. **WARNING:** Ensure that the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.

6. WARNING: It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
7. WARNING: Liquids and other foods must not be heated in sealed containers since they are liable to explode.
8. When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition.
9. Only use utensils that are suitable for use in microwave ovens.
10. If smoke is emitted, switch off or unplug the appliance and keep the door closed in order to stifle any flames.
11. Microwave heating of beverages can result in delayed eruptive boiling; therefore care must be taken when handling the container.
12. The contents of feeding bottles and baby food jars shall be stirred or shaken and the temperature checked before consumption, in order to avoid burns.
13. Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode, even after microwave heating has ended.
14. The oven should be cleaned regularly and any food deposits removed
15. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

16. The appliance must not be installed behind a decorative door in order to avoid overheating. (This is not applicable for appliances with decorative door.)
17. Only use the temperature probe recommended for this oven (for ovens provided with a facility to use a temperature-sensing probe.)
18. The microwave oven shall not be placed in a cabinet unless it has been tested in a cabinet.
19. The microwave oven must be operated with the decorative door open. (for ovens with a decorative door.)
20. This appliance is intended to be used in household and similar applications such as:
 - staff kitchen areas in shops, offices and other working environments;
 - by clients in hotels, motels and other residential type environments;
 - farm houses;
 - bed and breakfast type environments.
21. The microwave oven is intended for heating food and beverages. Drying of food or clothing and heating of warming pads, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire.
22. Metallic containers for food and beverages are not allowed during microwave cooking.
23. The appliance shall not be cleaned with a steam cleaner.
24. The appliance is intended to be used freestanding.
25. The rear surface of appliances shall be placed against a wall.

26. Steam cleaner is not to be used.
27. Surface of a storage drawer can get hot.
28. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.
29. **WARNING:** The appliance and its accessible parts become hot during use. Care should be taken to avoid touching heating elements. Children less than 8 years of age shall be kept away unless continuously supervised.
30. During use the appliance becomes hot. Care should be taken to avoid touching heating elements inside the oven.
31. **WARNING:** Accessible parts may become hot during use. Young children should be kept away.
32. **WARNING:** When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.

To Reduce the Risk of Injury to Persons Grounding Installation

DANGER

Electric Shock Hazard
Touching some of the internal components can cause serious personal injury or death. Do not disassemble this appliance.

WARNING

Electric Shock Hazard

Improper use of the grounding can result in electric shock. Do not plug into an outlet until appliance is properly installed and grounded.

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current.

This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood or if doubt exists as to whether the appliance is properly grounded. If it is necessary to use an extension cord, use only a 3-wire extension cord.

1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. If a long cord set or extension cord is used:
 - 1) The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
 - 2) The extension cord must be a grounding-type 3-wire cord.
 - 3) The long cord should be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over unintentionally.

CLEANING

Be sure to unplug the appliance from the power supply.

1. Clean the cavity of the oven after using with a slightly damp cloth
2. Clean the accessories in the usual way in soapy water.
3. The door frame and seal and neighbouring parts must be cleaned carefully with a damp cloth when they are dirty.
4. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.
5. Cleaning Tip—For easier cleaning of the cavity walls that the food cooked can touch: Place half a lemon in a bowl, add 300ml (1/2 pint) water and heat on 100% microwave power for 10 minutes. Wipe the oven clean using a soft, dry cloth

UTENSILS

CAUTION

Personal Injury Hazard

It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.

See the instructions on "What will you do in a microwave oven or to be avoided in microwave oven." There may be certain non-metallic utensils that are not safe to use for microwaving. If in doubt, you can test the utensil in question following the procedure below.

Utensil Test:

1. Fill a microwave-safe container with 1 cup of cold water (250ml) along with the utensil to be tested.
2. Cook on maximum power for 1 minute.
3. Carefully feel the utensil. If the empty utensil is warm, do not use it for microwave cooking.
4. Do not exceed 1 minute cooking time.

Materials you can use in microwave oven

Utensils	Remarks
Browning dish	Follow manufacturer's instructions. The bottom of browning dish must be at least 3/8 inch (9mm) above the turntable. Incorrect usage may cause the turntable to break.
Casseroleware	Microwave-safe only. Follow manufacturer's instructions. Do not use sealed or capped dishes.
Glass jars	Always remove lid. Use only to heat food until just warm. Most glass jars are not heat-resistant and may break.
Glassware	Heat-resistant oven glassware only. Microwave oven is not metallic arm. Do not use cracked or chipped dishes.
Cover cooking bags	Follow manufacturer's instructions. Do not close with metal tie. Make slit to allow steam to escape.
Paper plates and cups	Use for short-term heating only. Do not leave over unattended while cooking.
Paper towels	Use to cover food for reheating and absorbing fat. Use with supervision for short-term cooking only.
Parchment paper	Use as a cover to prevent spattering or a wrap for reheating.
Plastic:	Microwave-safe only. Follow the manufacturer's instructions. Should be labeled "Microwave Safe". Some plastic containers soften as the food inside gets hot. "Boiling bags" and tightly closed plastic traps should not be heated or washed as directed by package.
Plastic wrap	Microwave-safe only. Use to cover food during cooking to retain moisture. Do not allow plastic wrap to touch food.
Thermometers	Microwave-safe only (read and verify them-readless).
Wax paper	Use as a cover to prevent spattering and retain moisture.

Materials to be avoided in microwave oven

Utensils	Remarks
Aluminum foil	May cause arcing. Transfer food into microwave-safe dish.
Food carton with metal handle	May cause arcing. Transfer food into microwave-safe dish.
Metal or metallic utensils	Metal reflects the food from microwave energy. Metal items may cause arcing.
Metal twist ties	May cause arcing and could cause a fire in the oven.
Paper bags	May cause a fire in the oven.
Plastic foam	Plastic foam may melt or contaminate the liquid inside when exposed to high temperature.
Wood	Wood will dry out when used in the microwave oven and may split or crack.

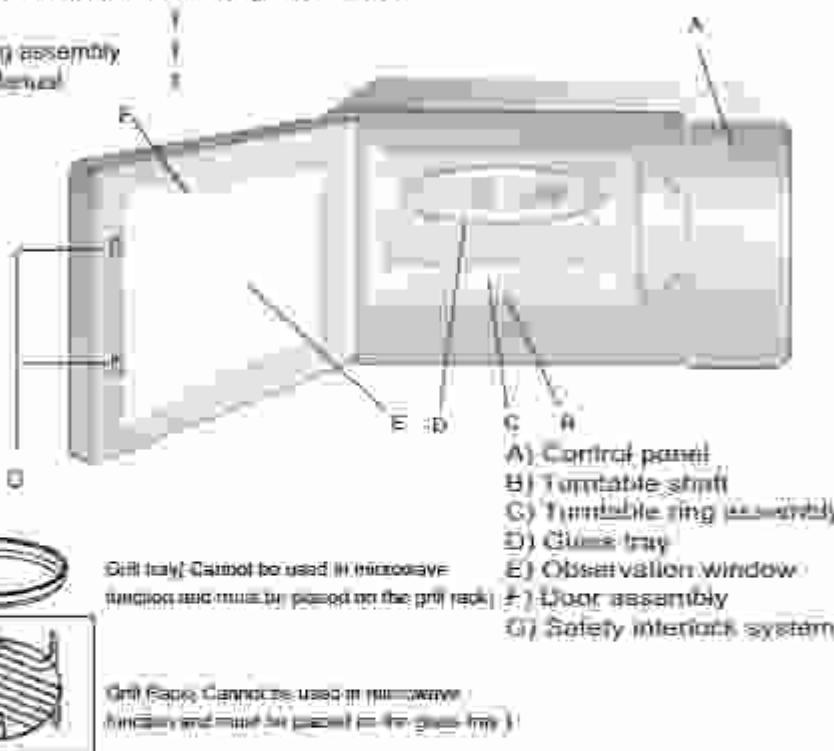

SETTING UP YOUR OVEN

Names of Oven Parts and Accessories

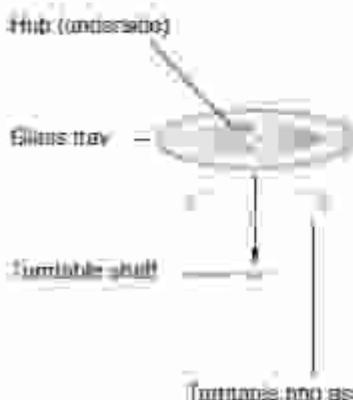

Remove the oven and all materials from the carton and oven cavity. Your oven comes with the following accessories:

Glass tray

Turntable ring assembly
Instruction Manual

Turntable Installation

- Never place the glass tray upside down. The glass tray should never be restricted.
- Both glass tray and turntable ring assembly must always be clean during cooking.
- All food and containers of food are always placed on the glass tray for cooking.
- If glass tray or turntable ring assembly cracks or breaks, contact your nearest authorized service center.

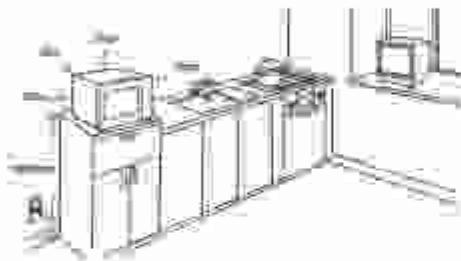

Countertop Installation

Remove all packing material and accessories. Examine the oven for any damages such as dents or broken door. Do not install if oven is damaged.

Cabinet: Remove any protective film found on the microwave oven cabinet surface. Do not remove the light brown Mica cover that is attached to the oven cavity to protect the magnetron.

Installation

1. Select a level surface that provide enough open space for the intake and/or outlet vents.

- (1) The minimum installation height is 85cm.
- (2) The rear surface of appliance shall be placed against a wall. Leave a minimum clearance of 30cm above the oven. A minimum clearance of 20cm is required between the oven and any adjacent walls.
- (3) Do not remove the legs from the bottom of the oven.
- (4) Blocking the intake and/or outlet openings can damage the oven.

(5) Place the oven as far away from radios and TV as possible. Operation of microwave oven may cause interference to your radio or TV reception.

2. Plug your oven into a standard household outlet. Be sure the voltage and the frequency is the same as the voltage and the frequency on the rating label.

WARNING: Do not install oven over a range cooktop or other heat-producing appliance. If installed near or over a heat source, the oven could be damaged and the warranty would be void.

The accessible surface may be hot during operation.

With respect to the first question, it is clear that the *U.S. Constitution* does not provide for a right to privacy. The *Bill of Rights* protects certain individual rights, such as freedom of speech, religion, and assembly, but it does not specifically mention privacy. The Supreme Court has, however, recognized a "right to privacy" based on the Due Process Clause of the Fourteenth Amendment, which protects individuals from "deprivation of life, liberty, or property without due process of law." This right to privacy has been used to protect various personal freedoms, such as the right to marry, the right to have an abortion, and the right to engage in consensual sexual activity.

Model Output: "SAC has just been initialized for the current case, and has output 100 WRF model forecasts."

Step: Iterating over subsequent model time periods (as many as you like).
For each iteration, it takes the latest WRF output from the previous
step.

Model Output: "SAC has just been initialized for the current case, and has output 100 WRF model forecasts."

Now there are two available model outputs:

Step: Pick WRF output (either WRF or SLC) and run it.

Model Popular

- A simple model which has a single parameter.
- It requires 3 inputs: θ_0 , θ_1 and θ_2 .
- It has some assumptions about the function.
- It is good for fitting linear data.
- It is good for non-linear data.

Initial Points:
Starting with 1000, the following reductions were made:
Initial low point, initial high, initial time, 2000, Set distance, Counter, Remaining time.

(0.1) Furthermore, initially redundant entries will be removed (% the sum of all points = 1000).

Initial Points:
Step 1: Initial activation point (100) was reduced by 100 to make
Initial low point.
Step 2: Initial low point was removed.
Step 3: Remaining reductions removed, initial activation point
removed (reduced by the previous step).
Final result: 100 (100 - 100 = 0, so nothing else can be removed).

Mobile Reporting

Each day will have three main times:

App 1) Arrival (from airport or bus stop) with check-in and luggage

App 2) Breakfast

App 3) Bedtime (you are asleep)

Each individual will have one of these three apps. This allows each "operator" to log their own time.

Model Updates

Model updates are additions or removals of knowledge. Structure knowledge base or knowledge base with respect to the individual concept of dissociativity
 and the equality representation of neutralities.

Model Updates

Model updates happen when one adds knowledge to the base. The new knowledge can be a fact, a function, a constraint, a theorem, etc. (typically, when one creates a linguistic entity, one needs to add some knowledge about it).

The following section lists basic software applications. You can download

using commercially available software or open source.

and try to determine what features it has and what you like about it. You can also compare it with other software.

You will receive marks for your work done, e.g., writing long programs, analyzing data, etc.

But nothing can substitute your original implementation ideas.

Child Abuse: A child who is physically, sexually, or emotionally abused has a propensity to become a child abuser. Such children also are more likely to commit other violent acts. Some studies have found that children who abuse their parents are more likely to abuse their spouses than children who do not abuse their parents. The link between child abuse and spouse abuse is less clear, but it is believed that child abuse may contribute to spouse abuse. In many cases, child abuse and spouse abuse occur together.
